

**Our Home in Need**  
**By Amy Guillen Fuentes**

Vibrant features  
Beautiful creatures  
Flowers that bloom lovely  
Great waters that move so softly

Fresh fruits and vegetables  
Grown on Earth for us  
And what do we do?  
We hurt instead of protect;  
Break instead of heal  
Is that correct?

Do we really want to kill our planet?  
The one that gave us everything?  
Are we really going to make this habit?  
Is this what we want to bring?  
The memory of us harming and panic?

What if we helped?  
Let us clean the beaches, removing plastic  
The need for reform is drastic  
Let us plant trees and limit paper strain  
To stop the spreading of pain  
Let reuse and recycle to make the Earth safer

Let's join together, save our Earth  
We have the power to make it true  
We can show our worth  
To help generations have a beautiful view
