Writing

Our Power Our Planet

Everywhere I see,

it is as dirty as can be.

Plants are dying,

Wildlife is frying.

The fish are even crying.

Pollution is not a solution.

We need real nutrition.

Do not litter and conserve energy,

please world LISTEN TO ME!

Think about your actions,

drive electric cars with good traction.

Maybe take the bus or ride a bike,

so animals and humans can enjoy their lives.

Lets keep a good pace! Listen to me, and

Let the Earth be safe.
