### What Recycling is

The earth revolves around a blue bin,  
A blue bin means to save  
But what is there to save at all  
If nothing gets recycled, just thrown away?

Bottles that could be remade again,  
Paper that could be used again,  
Cans that could be melted  
Instead of left to pile up  
Without a sound.

The air grows dark, the Earth feels it,  
The weather feels it  
The animals feel it  
We humans feel it  
As pollution starts to spread around  
From all the things we could've saved  
But chose to waste instead.

When we choose to use the blue bin,  
We use what was once wasted,  
And what was once valuable and useful  
Becomes valuable again.

All it takes is a choice  
A moment to recycle  
A moment to notice that recycling is  
how our planet will survive.

The air will feel lighter and brighter now,  
The air will be cleaner  
The streets will be cleaner  
Our animals will survive  
We will breathe more  
We will see a difference  
Once we turn to recycling.
