

## Our Power, Our Planet

The Earth is ours, so we have to care  
For the trees, the oceans, life everywhere.  
By recycling more and wasting less,  
We can help the planet and clean up the mess.

A bottle reused, a can in the bin,  
Small choices we make can lead to big wins.  
Turning off lights, using less plastic too,  
Can help make a better world for me and you.

Our power is strong when we work as one,  
Real change can start with anyone.  
Sharing ideas in school and at home  
Can help our planet continue to grow.

The Earth gives us beauty, air, and light,  
So protecting it now is doing what's right.  
If we all do our part, both old and young,  
A cleaner future can be built by everyone.

So recycle, reduce, reuse what you can,  
Helping the planet starts with one plan.  
Because our power can make change happen,  
And our planet is worth protecting.
