

It's Earth Day, let's us all be aware,
The smell of Earth is in the air,
There's land, there's sky, and then there's sea,
Won't you help the Earth with me?

Head to the store to get some supplies,
It shouldn't come as a surprise,
You can easily just buy a bin,
To take home and put your compost in

If you ever bought a plastic bottle,
Don't throw it out, not even the cap,
'Cause you shouldn't eat your fish in plastic wrap
Just reuse the plastic and drink your water
Keep the Earth clean for everyone's sons and daughters

Some might ask, what else can I do?
But honestly, that's all up to you!
Maybe donate clothes instead of throwing them away
This decreases the wastelands that turn the Earth grey

Recycle all the trash that you can,
There's metal, there's plastic, there's paper, there's glass,
Sorting these helps them break down in mass
Rather than pollution going all around the grass

You should also not buy single use items,
Probably don't even try to invite 'em
These things can destroy the Earth,
This can make it unsafe to surf

There is so many options and things you can do,
To keep the land green, and the sky and ocean blue.
Time to decide, what are you gonna do?
Of course, you can help too!
Let's make the Earth cleaner for me and you!
